

FOR IMMEDIATE RELEASE

Eksjö Energi selects ZemFusion for open access and aggregated services management

ZemFusion™ optimizing workflow and increases the income of the network

Varberg, Sweden. September 1, 2011 – Zemware AB, the Zero Effort Management Company today announced the Swedish utility company Eksjö Energi AB has implemented ZemFusion for open access and aggregated services management of its entire FTTH and DSL networks.

Eksjö Energi will use a single interface to manage multiple service providers and subscribers in an open access network making it possible to deliver services in an efficient way using different access methods to reduce costs and introduce innovative new services. The solution also utilizes the Zemware equipment plug-in interface to provision Alcatel-Lucent Service Router and Procera Networks PacketLogic allowing Eksjö Energi to implement user authentication, per subscriber and service policy enforcement in real time.

“We now have the tools to create cost-effective, open and flexible network that allow subscribers to choose mixed service offerings. The Zemware solution ensures a sustained quality level in service fulfillment and network automation. We recognize the real business advantage using Zemware and by using the workflow functionality in ZemFusion we can optimize our day to day operations and reduce cost,” said Kjell Ljunggren, CTO at Eksjö Energi.
